```

The bash shell doesn't accept parameter passing in aliases (the !*), so the alias provided for sending files to the trash with the rm command will not work. To do this with bash, you need to use a function, as follows:

```
rm () { /bin/mv -i ${*} ~/.Trash; }
```

You might want to rename it, such as del (for delete):

```
del () { /bin/mv -i ${*} ~/.Trash; }
```

You can then run the command as if it were an alias.
